

How to play

Fill the grid so that each row, each column and each 3x3 box holds the digits 1 to 9, each once.

Dashed outlines mark cages. The small number in the corner of a cage is the sum of the digits in that cage. A digit never repeats in a cage.

There are no starting digits: every digit follows from the cage sums.

Level 1 has mostly 2-cell cages. Levels 2 and 3 have more cages of 3 to 5 cells.

Puzzle 17

Level 2

23			5	12		34	10	4
10								
9		5	21		6		22	22
9	12			6				
				16		11		
16	17		12				13	
	13			13				19
	21		8		8			
6				22				

Rows, columns and 3x3 boxes: 1 to 9 once each.
Cage digits add up to the small number and never repeat.
