

How to play

Fill the grid so that each row, each column and each 3x3 box holds the digits 1 to 9, each once.

Dashed outlines mark cages. The small number in the corner of a cage is the sum of the digits in that cage. A digit never repeats in a cage.

There are no starting digits: every digit follows from the cage sums.

Level 1 has mostly 2-cell cages. Levels 2 and 3 have more cages of 3 to 5 cells.

Puzzle 17

Level 2

15	21		13	9		9		
						18		16
17			25					
		24				11	18	7
29			12					
6	15		11	20				
				15	13		11	
	22				10		29	
		9						

Rows, columns and 3x3 boxes: 1 to 9 once each.
Cage digits add up to the small number and never repeat.
